

# Attention Overlook at Qualchan Residents!

This is a friendly notice to inform you that blasting by North Idaho Drilling, Inc. on the Huber's Bluff off of Osprey Heights Dr. could start as early as Wednesday, February 21<sup>st</sup>, 2018. Blasting will take place on various days over the next 4 to 6 weeks. All existing homes are out of the blast zone. NIDI anticipates that vibration and air blast levels to be below industry standards, though you will still feel and hear the blasts as they take place. NIDI cannot estimate the exact time of each blast.

Prior to each blast there will be a series of whistles as follows:

- 5 long air horn signals to indicate 5 minutes till the blast
- 10 short air horn signals to indicate 1 minute till the blast
- THEN THE BLAST WILL OCCUR
- 1 long air horn signals to indicate that the area is clear

All Federal, State and Local regulations regarding both drilling and blasting will be followed. If you have any questions, please call ACI Northwest, Inc. at 208-209-0199 or Elite Explosive Services, LLC at 208-699-5770.

Please address all questions to Danyiel at (208)-699-5770
